REPLY BRIEF

Mail Stop Appeal Brief
Commissioner for Patents
P.O. Box 1450
Alexandria, Va. 22313-1450

Dear Sir:

In response to the Examiner's Answer dated November 17, 2006, Appellants submit this Reply Brief pursuant to 37 C.F.R. § 41.41. No fee is believed to be due for this Reply Brief, however, should any fees be due, the Patent Office is hereby authorized to charge any necessary fees, or credit any refunds, to our deposit account no. 22-0261, referencing our docket no. 29953-183223.

I. Status of Claims – M.P.E.P. § 1208(I); 37 C.F.R. § 41.37(c)(1)(iii)

The status of the claims is unchanged from the Appeal Brief. That is, pending claims 3-21 have all been finally rejected, and are appealed.

II. Grounds of Rejection to be Reviewed on Appeal – M.P.E.P. § 1208(I); 37 C.F.R. § 41.37(c)(1)(vi)

The grounds of rejection for review are:

Whether claims 3-21 are properly rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 5,887,739 to Prevot (Prevot) in view of U.S. 5,908,128 to Krishnakumar (Krishnakumar).

III. Argument – M.P.E.P. § 1208(I); 37 C.F.R. § 41.37(c)(1)(vii)

A. No New Grounds of Rejection Presented in the Examiner's Answer

The Examiner's Answer dated November 17, 2006, does not contain a rejection designated as a new ground of rejection, nor does it appear to contain any undesignated new grounds of rejection. *See* M.P.E.P. §§ 1207.03(III)-(IV). Section 9 of the Examiner's Answer, titled "Grounds of Rejection," is believed to recite the same grounds of rejection presented in the Final Office Action dated January 11, 2006. Accordingly, the Appellants are not required to exercise the options set forth in 37 C.F.R. §§ 41.39(b)(1)-(2) to avoid *sua sponte* dismissal of the appeal as to claims subject to a new ground of rejection. Nonetheless, the Appellants request that the appeal be maintained by the filing of this Reply Brief, which is submitted in accordance with 37 C.F.R. § 41.41. No new amendments, affidavits, or other evidence are being submitted with this Reply Brief.

B. Reply to Examiner's "Response to Argument"

The Examiner's conclusion that the combination of Krishnakumar and Prevot teaches the claimed invention is erroneous. The Examiner appears to argue that because Krishnakumar states that the bottle disclosed therein is pasteurizable, the combination of Krishnakumar and Prevot will result in a bottle that is able to withstand the pasteurization process. However, the container of Prevot cannot endure the high heat of pasteurization. In fact the Examiner admits on page 3 of the Answer that Prevot does not disclose pasteurizing the filled and capped container, as required by Appellants' claims. (See, e.g., claim 3, lines 11-13.) Nonetheless, the Examiner then concludes that it would have been obvious to a person of skill in the art to pasteurize the container of Prevot, as well as to provide the other features of the claimed invention that Prevot lacks, such as vertically spaced grooves in the sidewall, footed base, and crystallinity in excess of 25%. Thus, the Examiner makes the improper assumption that a container suited to hot-filling is also capable of withstanding the high temperatures of pasteurization.

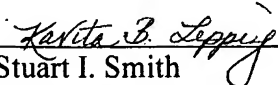

As stated in the Appeal Brief, pasteurization requires temperatures that far exceed those of hot-filling. Hence, a person of skill in the art would not modify the container of Prevot in the manner suggested by the Examiner because there is no reason to expect that the combination would be successful. Accordingly, no reasonable combination of Krishnakumar and Prevot will result in Appellants' claimed container and claims 3-21 are patentable over the references. The rejection under 35 U.S.C. §103 must be reversed.

IV. Conclusion

In conclusion, the Appellants respectfully request reversal of the Examiner's rejections of claims 3-21.

Respectfully submitted,

January 16, 2007
